DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 15-18 and 20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Grace et al. (US 6,062,134).

Grace et al. clearly disclose a distributed charge inflator system substantially as claimed by the applicants claims 15-18 and 20 (see at least Figs. 1a, 3, 5, 4m; Figs. 5 and 5a and the supporting sections of the specification).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 19, 21, 22, 23 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grace et al. (US 6,062,134) in view of WO 01/34516 A2 (Primex Aerospace Company).

Regarding claims 19, 21 and 22, Primex Aerospace Company clearly discloses the features and components of applicants claims 19, 21 and 22 (see at least pages 5-10 and Figs. 1-3) and it would therefore have been obvious to one of ordinary skill in the

Art Unit: 3641

art at the time of the invention to include such features and components in the Grace et al. distributed charge inflator so as to enhance its occupant protective performance during a crash event.

Regarding claims 23 and 24, the examiner takes official notice that booster charges for boosting the ignition of a charge or plurality of charges were well known in the art at the time of the invention. In view of this official notice, it would therefore have been obvious to one of ordinary skill in the art to include a booster charge in the Grace et al. inflator system so as to boost the ignition of the Grace et al. distributed charges and therefore ensure that the inflation gas would be produced in a timely manner after ignition.
